

Emery Keelesdale Nurse Practitioner-Led Clinic

Celebrating Nurse Practitioner Week in November!

The Choice For Millions...

Nurse Practitioners are the health care providers of choice for millions of

Canadians each year, thanks to the high-quality, patient-centred care they provide. They listen to your needs and use advanced training to help tackle illness, maintain health and prevent disease. They can order, perform and interpret diagnostic tests as well as prescribe medication - and best of all, they take their time with you. At Emery Keelesdale, we have a dietitian and social worker working alongside 4 NPs to provide a full circle of care for anyone in need. Meet our staff below and find out how we can help you: 647-476-1351
